PROYECTO VALLE DE CACAULAPA  
CATALOG FORM

done. 01 July ATM.

DATE: 01 July 2002

LOT NUMBER: 016AE/008

SUBSTANCE: Stone

OBJECT: Mano

CATALOG #: 016AE/008-1 MULTIPLES? DRAWN BY: 41 CATALOGED BY: 41

EXCAVATOR: DIAMETER (only if item is basically circular; take average): 7.5

HGT/LENGTH: 29.5 WIDTH: 7.5 THICKNESS:

VERBAL DESCRIPTION:

This is a whole partial mano. If a partial mano, it is an end—a midsection.

The material is: vesicular basalt — other (describe or name)—

In cross-section, this item is: round — oval — square — rectangular — multi-sided. If multi-sided, how many?: 3

How many working surfaces/areas are visible: 3

The working surfaces/areas are: smoothed only — show use-related polish — can't tell.

The working surfaces/areas extend: completely — partially across the item as preserved.

The working surfaces measure (do each separately): 29.5 x 5.0, 29.5 x 6.0, 29.5 x 4.5

The end-to-end shape of this mano is: equal in width throughout — smaller on the end(s) than in the middle. If it is larger in the center, give the dimensions or diameters:

Minimum: 4.5

Maximum: 7.5

If an end is preserved, the end shows: pecking — grinding — striations — a smooth surface — a polished surface — can't tell.

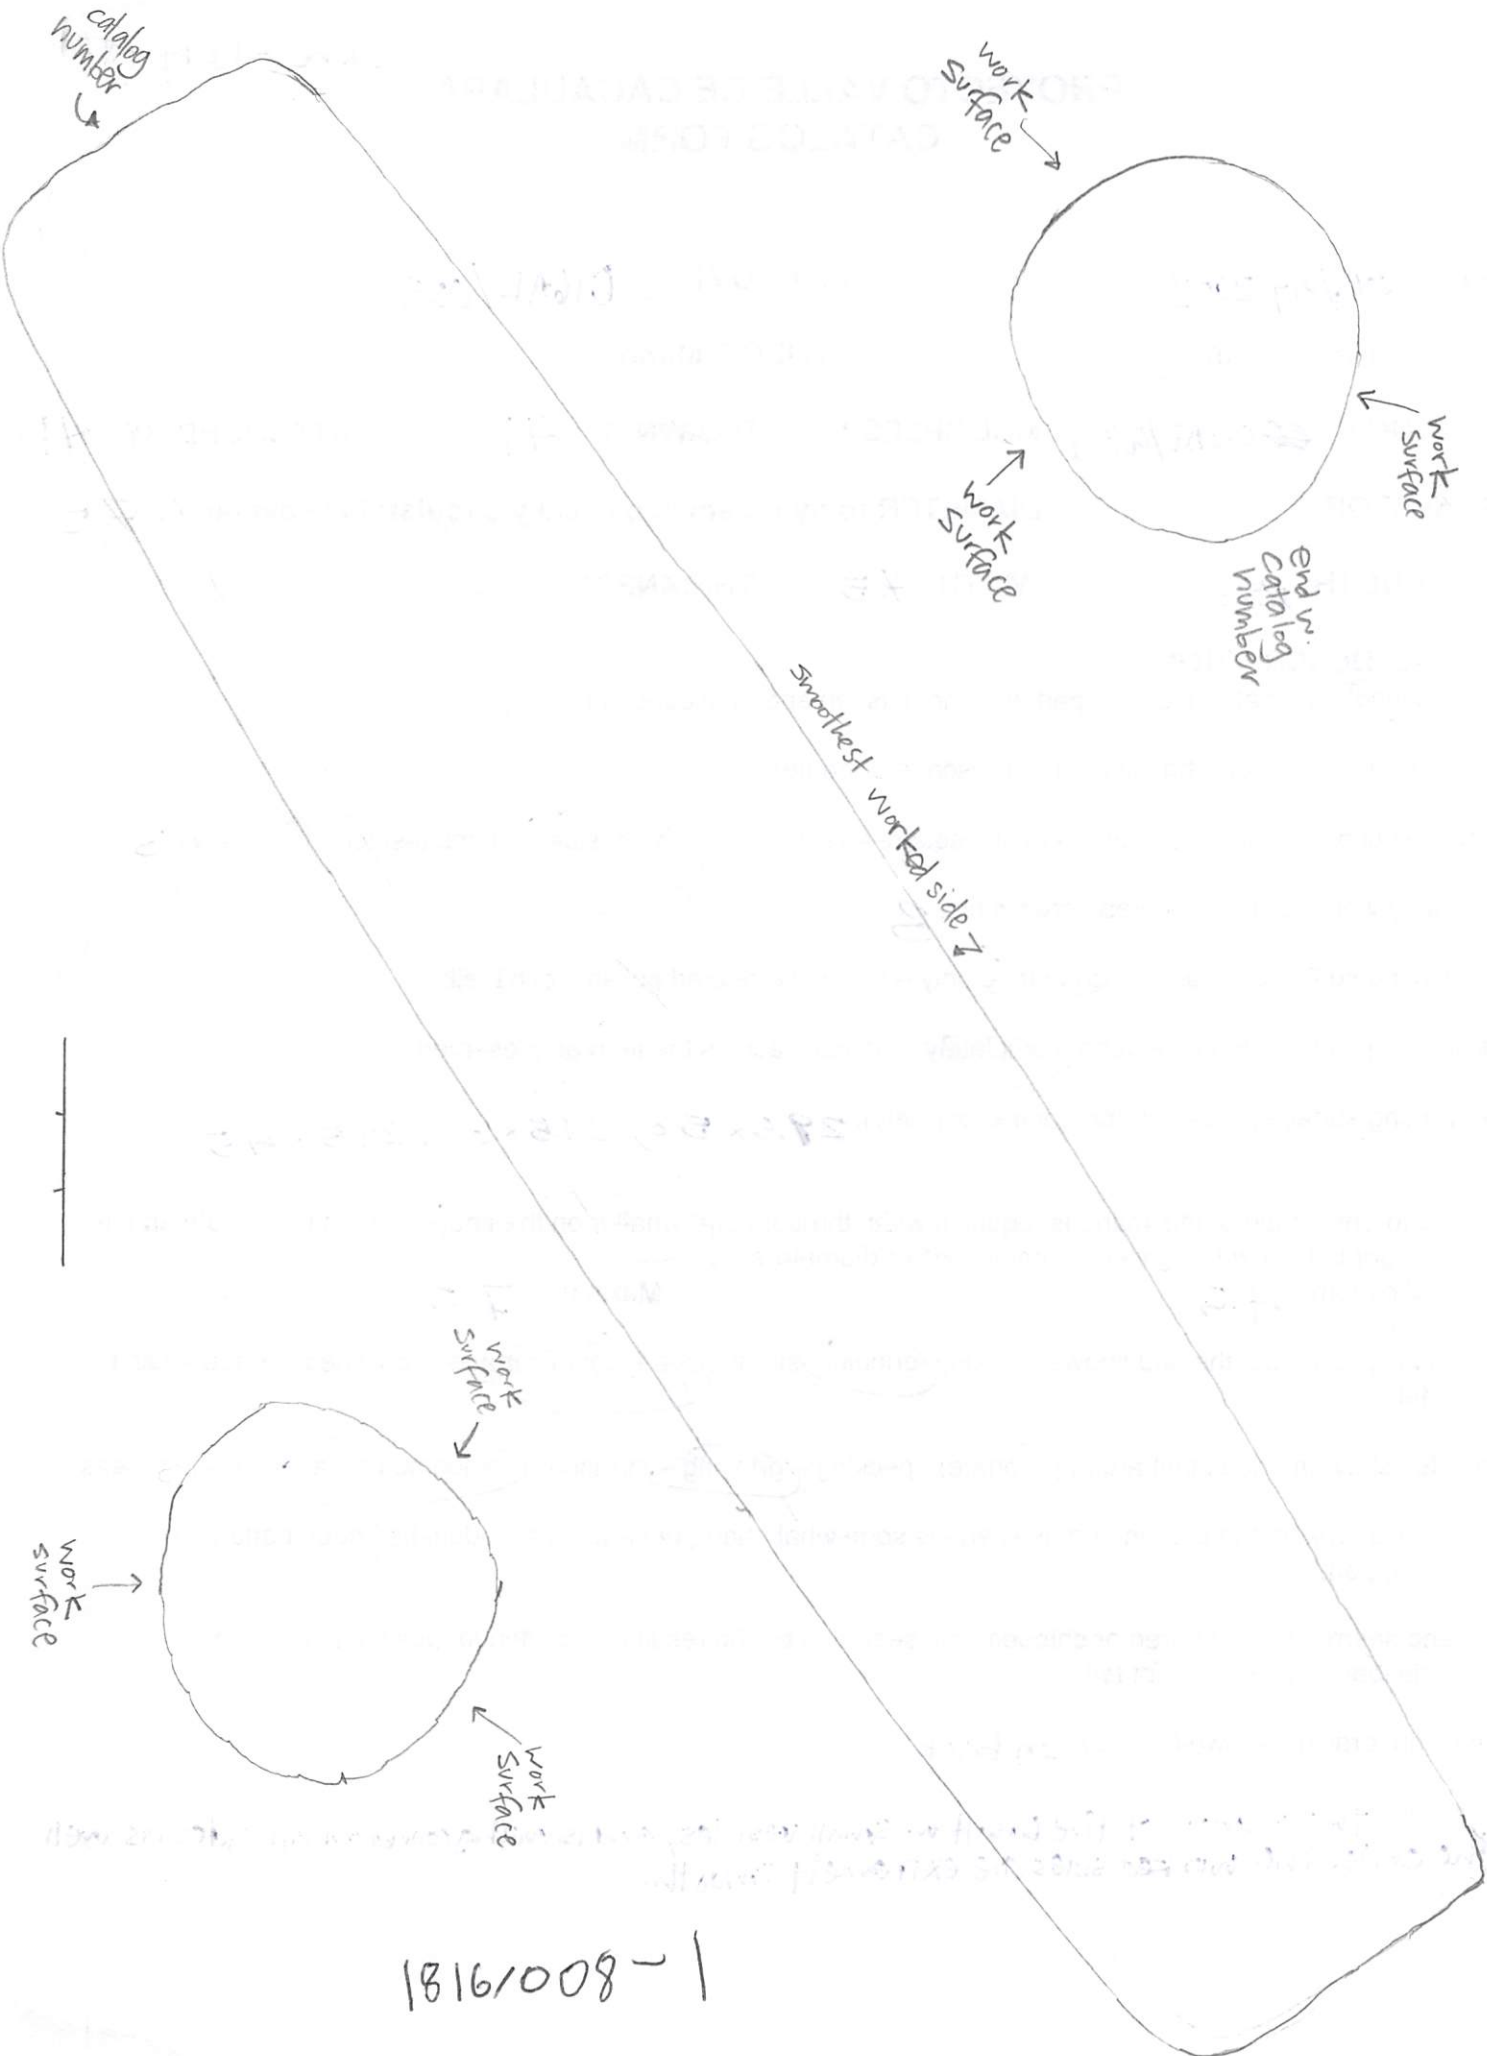

The sides show (mark all that are appropriate): pecking — grinding — striations — smoothed areas — polished areas.

If the item is broken, the broken end: is sharp — is somewhat sharp, but appears eroded — has been battered or chipped.

If the end seems to be battered or chipped, this seems to be the result of: accident/depositional conditions — deliberate use — cannot tell.

Item is: not drawn — drawn (where?) on back.

Comments: this mano is of fine basalt w. small vesicles, and is well ground on all sides as well as the ends. The worked sides are extremely smooth.
